

## Jabra BT620s Software upgrade - a step-by-step guide

### Main features

- Fixes the reconnection problem with LG and Motorola phones
- Improved echo control for better audio quality
- Improved the DSP algorithm to fix the static/buzz experienced sometimes when streaming music from a BT stereo phone

**PLEASE READ CAREFULLY BEFORE PROCEEDING**

Your paired devices and other settings made in your Bluetooth headset may be removed during the software installation process

Do not remove your Jabra BT620s during the installation process

### STEP-BY-STEP

#### STEP 1

- Connect the Jabra BT620s with the PC, using the USB cable.

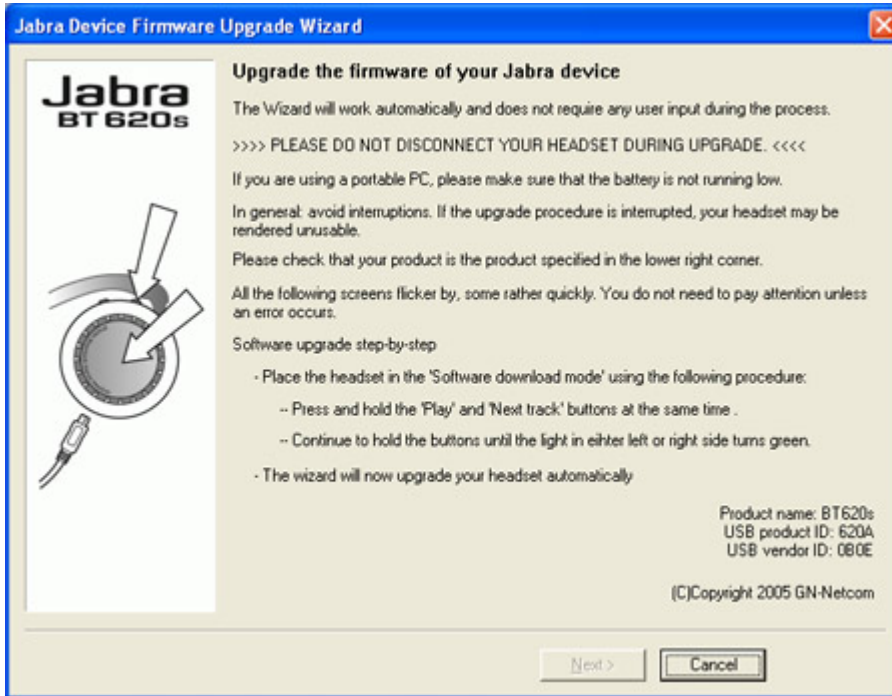

#### STEP 2

- To update your software unzip the attached software, then save to your Desktop.

#### STEP 3

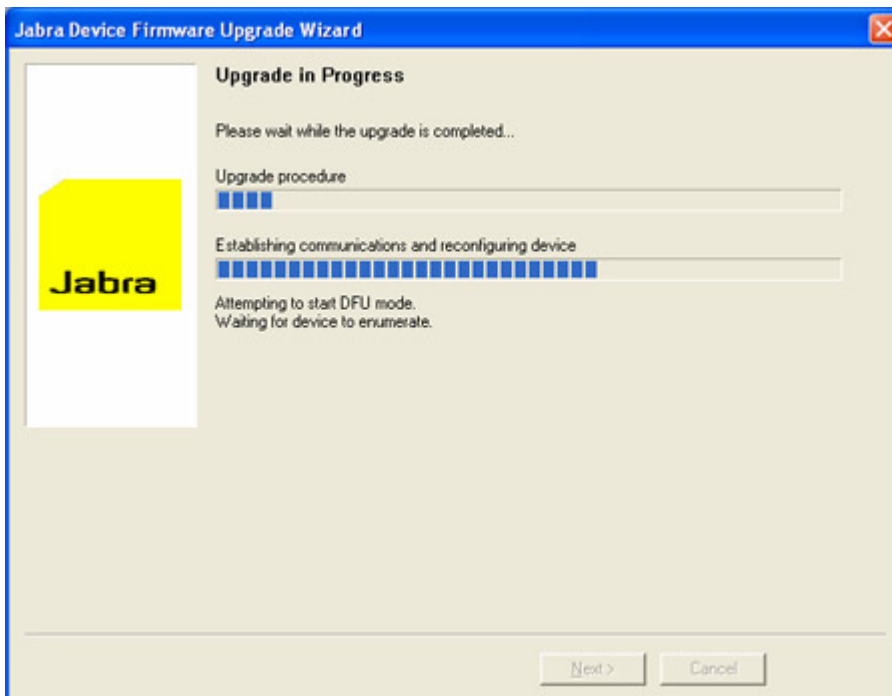

- Place headset in the "Software download mode" using the following procedure
  - Press and hold the "Play" and "next track" buttons at the same time.

- Continue to hold the buttons until the light in either left or right turns green

#### STEP 4

- Click Next to upgrade your software

## STEP 5

- The wizard will now upgrade your headset automatically. Your Jabra BT620s headset is ready for use when the window says: 'Successful upgrade'
